

Minimize Turnaround Time: CredSimple Completes 90% of Files in 5 Days*

“Extremely responsive and flexible. CredSimple has helped us improve our process and has readily responded to specific requests. They've also helped us turnaround a significant backlog in an extremely timely manner. Thank you!”

JENNIFER M, CREDSIMPLE CLIENT

How We Achieve an Average of 5-Day Turnaround

01. / Digital Application Takes 20 Minutes

Our application takes 20 minutes to complete or we can import data from CAQH or import your raw provider data in bulk.

02. / Automated Primary Source

We use data-matching algorithms for primary source verification, drastically reducing manual data entry and validation as well as time to completion.

03. / Application Doesn't Allow For Typos

Our application's real-time validation means providers can't input incorrect information (so won't need to return later to correct answers).

Why it Matters

REDUCE COST

Our automation can reduce credentialing costs by up to 50%

NETWORK ADEQUACY

Quickly activate new providers in order to meet network adequacy requirements

ELIMINATE COMPLIANCE RISKS

Remove backlogs or gaps in the credentialing process - restore compliance in 30 days

IMPROVE PAYER-PROVIDER RELATIONSHIP

Our platform offers fast and efficient work processes with providers, relieving the administrative burden credentialing typically has on providers
