# andros\*

## Bring your provider network to market faster, anywhere.

## Complete, compliant, and credentialed

**andros** scales up your team's capacity to build compliant provider networks in new markets—while reducing your administrative costs—using our optimized process and powerful androsCompass\* technology.

### Data

Built on the a\* platform, the healthcare industry's largest provider data resource

Fastest-path-to-adequacy approach targets critical providers first

#### Scalability

andros builds healthcare networks across specialties and across the nation

### Start smarter

Save time and money with a data-driven market viability analysis powered by the a\* platform. By understanding the results of our market assessment, you can rest assured that your network development project will be viable in the marketplace. Provider networks built for **3 of the 5** largest national health plans

## Follow the path to success

**androsCompass\*** drives the network development process through the stages of recruiting, contracting, and data management. Our revolutionary, omni-channel approach to recruiting and contracting follows the fastest path to adequacy, targeting mission-critical providers first and reducing the potential for wasted effort.

#### Recruiting

Increase speed-to-market as andros prioritizes the most desirable providers, specialists, and facilities to ensure network adequacy.

#### Contracting

ĨĨňĨĨ

Understand your progress and make informed go/no-go decisions using project and provider dashboards that track outreach and response rates.

#### Data management

andros collects and manages provider demographic information, making it easy for you to prepare a complete, compliant, and fully credentialed provider directory.

## Accelerate time to market

With **androsCredentialing\***, you can eliminate errors, meet filing deadlines, and reduce costs with our scalable, NCQA-compliant credentialing solution that can validate your provider roster in as little as two weeks.

When your network is complete and credentialed, andros can prepare a final data file for transmission back to the health plan or submission to CMS. 92% of the US population resides in a zip code where andros has contracted or credentialed providers
