

Case Study

It's clean. It's faster. It's complete

Vision Group HOLDINGS

The Challenge

Vision Group Holdings (VGH) oversees and manages two of the leading LASIK surgery providers in the world: The LASIK Vision Institute and TLC Laser Eye Centers.

VGH was challenged with finding the right CVO solution for them and their sister plan, QualSight. VGH alone had over 1,100 providers so they knew they needed the right support in order to be successful. Having vetted several CVOs, they chose andros because of its **10x faster turnaround time, easy-to-use platform and competitive price.**

The Solution

andros' platform saves VGH time, effort and added headcount. "It's clean. It's faster. It's complete," Rebecca says.

It's a team effort between andros and VGH. Often you pay for a service and that's it. There's no open dialogue. andros will go above and beyond to assist with improving your credentialing program.

“

I rely on andros to be 10 of me because I don't have the bandwidth to credential 1,100 providers. With all the demands on my time, I can't get through even 3 files a day. andros spins them out so quickly.

”
